THE MICROFILM SERVICE

Through the services of the Brown University Photographic Laboratory one can obtain, either on microfilm or as photoprint, the complete text of any article listed in MATHEMATICAL REVIEWS or available in the Brown University Library, except books and material of which the reproduction is prohibited by copyright laws.

Procedure for Ordering Microfilm or Photoprint

1. Give your name and address.
2. State whether you wish microfilm or photoprint.
3. (a) If the article in question has been listed in MATHEMATICAL REVIEWS, give the MF number printed at the end of the title. Titles without MF numbers are copyrighted.

   (b) If the article has not been reviewed (for instance because published prior to 1939) give as accurately as possible the author, title, journal, volume, year and pages.
4. Enclose cash for the amount of the order. U. S. currency or check, made payable to Brown University, will be accepted. The minimum charge is 45¢.
5. Mail to: *Brown University Photographic Laboratory, Providence, Rhode Island.*

Cost

MICROFILMS are furnished for

- 15¢ for articles with less than 25 pages.
- 30¢ for articles with more than 24 pages, but less than 50 pages.
- 50¢ for articles with more than 49 pages, but less than 100 pages.
- $1.00 for articles with more than 99 pages.

PHOTOPRINTS cost 20¢ per sheet, each sheet containing two pages of text, except in the case of unusually large journals (larger than 7" by 10"). In the latter case you will be informed of the extra charge before the order is filled, unless you have indicated on your order that the reprint is desired even at the higher price of 20¢ per page.

MINIMUM CHARGE. If an order totals less than 45¢ the cash included should be raised to 45¢ in order to cover the basic expenses of this service.

Microfilm and photoprints with MF numbers show black writing on white background. Articles which are not reviewed, and which therefore do not have an MF number, are reproduced only in negative films or prints, i.e. white letters on black background. Microfilms can be read in any reading machine adapted to standard 35 mm. double perforated film. Photoprints are on sheets 10" by 14" (about 25 by 35 cm.).

ONE-SIDE EDITION OF MATHEMATICAL REVIEWS

An edition of MATHEMATICAL REVIEWS printed on only one side of the paper is available to persons interested in making card files of reviews or wishing to add remarks to reviews in the future. This special edition may be obtained for an additional payment of $1.00. A regular current subscription can be changed to a one-side subscription by paying the additional $1.00. This edition is folded but not stitched.

MATHEMATICAL REVIEWS

Published monthly, except August, by

THE AMERICAN MATHEMATICAL SOCIETY, Prince and Lemon Streets, Lancaster, Pennsylvania

Sponsored by

THE AMERICAN MATHEMATICAL SOCIETY
THE MATHEMATICAL ASSOCIATION OF AMERICA
THE INSTITUTE OF MATHEMATICAL STATISTICS
THE EDINBURGH MATHEMATICAL SOCIETY
ACADEMIA NACIONAL DE CIENCIAS EXACTAS, FISICAS Y NATURALES DE LIMA
HET WISKUNDIG GENOOTSCHAP TE AMSTERDAM
THE LONDON MATHEMATICAL SOCIETY
UNION MATEMATICA ARGENTINA

Editorial Office

MATHEMATICAL REVIEWS, Brown University, Providence, R. I.

Subscriptions: Price $13 per year ($6.50 per year to members of sponsoring societies). Checks should be made payable to MATHEMATICAL REVIEWS. Subscriptions should be addressed to MATHEMATICAL REVIEWS, Lancaster, Pennsylvania, or Brown University, Providence, Rhode Island.

This publication was made possible in part by funds granted by the Carnegie Corporation of New York, the Rockefeller Foundation, and the American Philosophical Society held at Philadelphia for Promoting Useful Knowledge. These organizations are not, however, the authors, owners, publishers, or proprietors of this publication, and are not to be understood as approving by virtue of their grants any of the statements made or views expressed therein.

Entered as second-class matter February 1, 1940 at the post office at Lancaster, Pennsylvania, under the act of March 3, 1879. Accepted for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 538, P. L. and R. authorized November 9, 1940.

Mathematical Reviews

Vol. 6, No. 11 DECEMBER, 1945 Pages 285-334

AUTHOR INDEX

van Aardenne-Ehrenfest, T., and Wolff, J.
Über die Grenzen der einfachzusammenhängenden Gebiete. 149
Abbott, J. C.
The projective theory of non-Euclidean geometry. 99
Abdelhay, J.
On a special partial differential equation. 4
Abellanas, P. F.
The formulae of Schubert for the determination of the fundamental numbers of surfaces of second order. 101
Abramowitz, M.
Zeros of certain Bessel functions of fractional order. 132
Ado, I. D.
On nilpotent algebras and p-groups. 146
Agnew, R. P.
Summability of subsequences. 46
Euler transformations. 46
On sequences with vanishing even or odd differences. 46
A genesis for Cesàro methods. 150
Convergence fields of methods of summability. 150
Criteria for completeness of orthonormal sets and summability of Fourier series. 172
Spans in Lebesgue and uniform spaces of translations of step functions. 267
Agnew, R. P., and Hill, J. D.
Summability of bounded sequences. 46
Agostinelli, C.
Sulla trasformazione delle equazioni della dinamica. 24
Aharoni, J.
Effect of space charge on electron beams. 221
A general theory of antennae. 222
Aitken, A. C.
On the number of distinct terms in the expansion of symmetric and skew determinants. 32
Akopian, A. A.
Applications of thermodynamics to the equilibrium of ideal elastic systems. 138
Alaoglu, L., and Erdös, P.
A conjecture in elementary number theory. 117
On highly composite and similar numbers. 117
Albert, A. A.
The minimum rank of a correlation matrix. 6
Quasigroups. II. 42
Two element generation of a separable algebra. 115
Quasiquaternion algebras. 115
Albuquerque, J.
The Cantor-Bendixson theorem. 203
A theory of double series. 209
The theorems of Netto and Lüroth and the concept of dimension. 277
Alessi, J. M.
On the asymptotic integrals of LeRoy. 269
On the transformation of LeRoy for a dual variable. 269
Alexandroff, A. D.
Additive set-functions in abstract spaces. 275
Alfrey, T.
Non-homogeneous stresses in visco-elastic media. 27
Alfvén, H.
On the motion of a charged particle in a magnetic field. 168
Allen, D. N. de G., and Southwell, R. V.
Relaxation methods applied to engineering problems. X. The graphical representation of stress. 137
Allen, D. N. de G., Southwell, R. V., and Vaisey, G.
Relaxation methods applied to engineering problems. XI. Problems governed by the "quasi-plane-potential equation." 219
Allen, H. S.
T-transformations which leave the core of every bounded sequence invariant. 150
Projective convergence and limit in sequence spaces. 209
Alt, H.
Die Kardanlagen von Getriebegliedern und die Krümmung der Polkurven. 134
Amaral, I. M. Azevedo do. See Azevedo do Amaral.
Ambarzumian, V. A.
On the problem of diffuse reflection of light. 54
On the theory of brightness fluctuations in the Milky Way. 245
Ambrose, W.
Spectral resolution of groups of unitary operators. 131
Amerio, L.
Sulla definizione di integrale di Lebesgue. 120
Un preliminare teorema di analisi per lo studio dei moti con resistenza passiva. 154
Sull'applicazione della trasformata di Laplace all'integrazione di equazioni a derivate parziali senza alcun vincolo sul comportamento all'infinito della soluzione. 156
Su una questione relativa all'analisi periodale. 172
Su alcune questioni relative alla trasformazione di Laplace. 173
Teoremi di esistenza per le equazioni lineari del secondo ordine, di tipo ellittico, nei domini illimitati. 228
Ammeter, H.
Das Zufallsrisiko bei kleinen Versicherungsbeständen. 163
Ancochea, G.
Corps hyperelliptiques abstraits de caractéristique deux. 35
Anderson, T. W., and Girshick, M. A.
Some extensions of the Wishart distribution. 161
Andrews, W. H., Jr. See Marschak, J.
Andronow, A., and Bautin, N.
Le mouvement d'un avion neutre piloté automatiquement et la théorie des transformations ponctuelles des surfaces. 194
Andronow, A., and Mayer, A.
Le problème de Mises dans la théorie de la régulation directe et la théorie des transformations ponctuelles des surfaces. 154
Ansermet, A.
L'application à la géodésie d'un théorème de Tchebychef. 103
Aparo, E.
Di alcune avvertenze sulla risoluzione numerica delle equazioni algebriche. 132
Apéry, R., and Gauthier, L.
Extension des transformations birationnelles des courbes de l'espace ordinaire à l'espace ambiant. 17
Arbault, J.
Sur la convergence absolue des séries trigonométriques. 172
Archibald, R. C. See Bateman, H.
Armero, J. Garavito. See Garavito Armero.

Aroian, L. A.
Some methods for the evaluation of a sum. 162
Aronovitch, G. V.
Motion of a viscous incompressible fluid in a circular tube vibrating longitudinally. 77
Artemieff, N.
Une méthode pour déterminer les exposants caractéristiques et son application à deux problèmes de la mécanique céleste. 189
Artin, E.
On the theory of complex functions. 122
Artin, E., Nesbitt, C. J., and Thrall, R. M.
Rings with minimum condition. 33
Artobolevsky, I. I.
On two new loci in the kinematics of plane mechanisms. 189
On evolutes of connecting-rod curves. 242
Ascoli, G.
Sopra un'equazione funzionale. 271
Augé, J.
Characterization of a linear functional by the values which it takes on an analytic line. 276
Auluck, F. C. See Kothari, D. S.
Aumann, G.
Über Räume mit Mittelbildungen. 277
Azevedo do Amaral, I. M.
On the solution of integral equations of the first kind. 157
On integral equations. 271
On the solution of Volterra's integral equation of the first kind. 272

Baber, T. D. H., and Mirsky, L.
Note on certain integrals involving Hermite's polynomials. 65
Bachvaloff, S.
Sur un invariant des transformations asymptotiques. 215
de Backer, S. M.
The four-colour problem. 97
Baer, R.
Crossed isomorphisms. 40, 334
The fundamental theorems of elementary geometry. 98
Baker, H. F.
Obituary: Geoffrey Thomas Bennett, 1868–1943. 254
Balanzat, M.
Compact and separable sets in spaces D_Φ. 164
Balseiro, J. A.
Elements of the theory of functions of an antoidal tricomplex variable. 209
Explanation of an omission. 264
Bancroft, T. A.
On biases in estimation due to the use of preliminary tests of significance. 10
Note on an identity in the incomplete beta function. 212
Banerjee, D. P.
On some formulae in analytical theory of numbers. I, II. 39, 170
Banerji, A. C., and Varma, R. S.
On the motion of a compressible ellipsoid in a viscous fluid. 25
Barajas, A.
Birkhoff's theory of gravitation and Einstein's theory for weak fields. 240
Barajas, A., Birkhoff, G. D., Graef, C., and Vallarta, M. S.
On Birkhoff's new theory of gravitation. 72
Barbachine, E.
Les singularités locales des points ordinaires d'un système d'équations différentielles. 85
Sur certaines singularités qui surviennent dans un système dynamique quand l'unicité est en défaut. 86
Barbălat, B.
Sur les espaces topologiques les plus généraux. 277
Barbilian, D.
Aufbau der projektiven Geometrie in der absoluten Ebene. 13

Barker, C. B.
Proof that the Mersenne number M_{127} is composite. 255
Barten, H. J.
On the deflection of a cantilever beam. 83
Bartlett, M. S.
Negative probability. 231
Bary, N.
Sur les systèmes complets de fonctions orthogonales. 267
Basin, A. M.
A new approximate method for the calculation of laminar boundary layer. 78
Basoco, M. A.
On certain arithmetical functions due to G. Humbert. 58
Basu, K.
A note on Sonine's polynomials. II. 62
Batchelor, G. K.
Interference in a wind tunnel of octagonal section. 78
Power series expansions of the velocity potential in compressible flow. 174
Bateman, H.
Some integral relations. 65
Partial differential equations of mathematical physics. 86
Hamilton's work in dynamics and its influence on modern thought. 141
Bateman, H., and Archibald, R. C.
A guide to tables of Bessel functions. 132
Baten, W. D.
Analyzing degrees of freedom into comparisons when the "classes" do not contain the same number of items. 235
Bautin, N. See Andronow, A.
Bayard, M.
Sur une utile extension de la transformation de Laplace. 173
Beatty, S., and Wales, M.
Theory of algebraic functions based on the use of cycles. 35
de Beauregard, O. C.
Sur l'électromagnétisme des milieux polarisés; définition d'un tenseur de Maxwell asymétrique. 166
Bechert, K.
Ebene Wellen in idealen Gasen mit Reibung und Wärmeleitung. 136
Beck, G.
Introduction à la théorie des quanta. I. Le problème de la physique théorique. V. La mécanique quantique. 224
Beckenbach, E. F.
Concerning the definition of harmonic functions. 227
Beckerley, J. G.
Expansion of positive energy Coulomb wave functions in powers of the energy. 153
Begle, E. G.
Regular convergence. 95
Duality theorems for generalized manifolds. 182
Belenjkij, S. See Fursov, V.
Belenky, C. Z.
Concerning the wave resistance of bodies in the super sound flow. 78
Belinfante, F. J.
On the commutativity of the Dirac electron wave-function with the electromagnetical field. 167
Bell, E. T.
A method in rational diophantine analysis. 57
The golden and platinum proportions. 141
Sixes and sevens. 253
Separable Diophantine equations. 256
Bell, R. P.
A problem of heat conduction with spherical symmetry. 178
Eigen-values and eigen-functions for the operator $d^2/dx^2-|x|$. 213
The occurrence and properties of molecular vibrations with $V(x)=ax^4$. 213
Bellman, R.
Almost orthogonal series. 48
A note on an inequality of E. Schmidt. 61

Bellman, R. (Continued)
A stability property of solutions of linear differential equations. 66
A note on a theorem of Hardy on Fourier constants. 125
Some applications of the Fourier integral to generalized trigonometric series. 173
Benckert, C. R.
A variant of the sieve of Eratosthenes. 169
Benedikt, E. T.
On the representation of rigid rotations. 23
Benjamin, K.
An I.B.M. technique for the computation of $\sum X^2$ and $\sum XY$. 220, 334
Benneton, G.
Une arithmétique des biquaternions. 38
Berberjan, L. G.
On the problem of the propagation of surface waves on the boundary of two distinct media sliding one over the other. 84
Bergman, S.
The determination of some properties of a function satisfying a partial differential equation from its series development. 2
Solutions of linear partial differential equations of the fourth order. 69
Bernardelli, H.
The stability of the income distributions. 94
Bernays, P. See Hilbert, D.
Bernstein, B. A. See Foster, A. L.
Bernstein, S.
Complément à mon article "Renforcement du théorème des surfaces à courbure négative." 20
Sur les sommes de grandeurs aléatoires liées de classes (A, N) et (B, N). 88
Nouvelles généralisations du théorème de Liouville et son extension aux équations du type parabolique. 187
Berra, A. E. Sagastume. See Sagastume Berra.
Bers, L., and Gelbart, A.
On a class of functions defined by partial differential equations. 86
Beskin, L.
General solution of two-dimensional problems of elasticity. 138
Theory of membranes in shape of developable surfaces. 138
Bethe, H. A.
Theory of diffraction by small holes. 165
Bhattacharya, K. N.
On a new symmetrical balanced incomplete block design. 163
A new balanced incomplete block design. 163
Bhattacharyya, A.
On a measure of divergence between two statistical populations defined by their probability distributions. 7
On some sets of sufficient conditions leading to the normal bivariate distribution. 8
Bhattacharyya, B. C.
On an aspect of Pearsonian system of curves and a few analogies. 8
Bicadze, A. V.
On local deformations in compressed elastic bodies. 80
On a general representation of solutions of linear elliptic differential equations. 154
Bieberbach, L.
Theorie der Differentialgleichungen. 153
Lehrbuch der Funktionentheorie. I. Elemente der Funktionentheorie. II. Moderne Funktionentheorie. 261
Bieri, H.
Invariante Herleitung der Differentialgleichungen für 3-fache Orthogonalsysteme. 20
Bilharz, H.
Geometrische Darstellung eines Satzes von Hurwitz für Frequenzgleichungen fünften und sechsten Grades. 198
Bilharz, H. (Continued)
Zur Reduktion von Bewegungsgleichungen auf die Lagrangesche Form. 227
Bilimovitch, A.
Über die Anwendungen der Pfaffschen Methode in der Störungstheorie. 243
Birkhoff, G.
Metric foundations of geometry. I. 12
Subdirect unions in universal algebra. 33
Birkhoff, G. D. (Cf. Barajas, A.)
Flat space-time and gravitation. 72
The mathematical concept of time and gravitation. 240
Birnbaum, Z. W., and Zuckerman, H. S.
An inequality due to H. Hornich. 160
Bishop, D. J.
The renewal of aircraft. 234
Bisshopp, K. E.
Lateral bending of symmetrically loaded conical discs. 81
The inverse of a stiffness matrix. 218
Bissinger, B. H.
A generalization of continued fractions. 150
Blackwell, D.
The existence of anormal chains. 233
Blanusa, D.
Über die Anzahl der Bedingungsgleichungen beliebigen geodätischen Netzen. 281
Blasov, A. A. See Vlasov.
Blaschke, W., and Bol, G.
Geometrie der Gewebe. Topologische Fragen der Differentialgeometrie. 19
Blažko, S. N.
On the astronomical refraction. 281
Bliss, C. I.
A chart of the chi-square distribution. 9
Bliss, G. A.
Mathematics for exterior ballistics. 24
Bloch, A.
A new approach to the dynamics of systems with gyroscopic coupling terms. 23
Blumberg, H.
Arbitrary point transformations. 205
Blumenthal, L. M.
Remarks on a weak four-point property. 12
Boas, R. P., Jr.
Functions of exponential type. III, IV. 60, 123
A differential inequality. 147
Concerning the sequence $\{\cos n_k x\}$, $n_k \to \infty$. 264
Boas, R. P., Jr., and Kac, M.
Inequalities for Fourier transforms of positive functions. 265
Bobroff, A. A.
Conditions of applicability of the strong law of large numbers. 233
Bochner, S.
Group invariance of Cauchy's formula in several variables. 123
Boundary values of analytic functions in several variables and of almost periodic functions. 124
Bockstein, M.
Homological invariants of the topological product of two spaces. 97
Bödewadt, U. T.
Zur Iteration reeller Funktionen. 171
Bogorodsky, A. T.
Doppler effect in a static gravitation field. 242
On the nature of the red shift in the spectra of extragalactic nebulae. 242
Bol, G. (Cf. Blaschke, W.)
Doppelverhältnisse im Fünfgewebe. 19
Borgen, S.
Note on the summability of Poisson's formula. 266

Born, M., and Peng, H. W.
Quantum mechanics of fields. II. Statistics of pure fields. 167
Quantum mechanics of fields. III. Electromagnetic field and electron field in interaction. 167
Borowicka, H.
Die Druckausbreitung im Halbraum bei linear zunehmendem Elastizitätsmodul. 138
Über ausmittig belastete, starre Platten auf elastisch-isotropem Untergrund. 138
Bos, W. J. (Cf. Weitzenböck, R.)
Zur projektiven Differentialgeometrie der Regelflächen im R_4. IX, X, XI, XII, XIII. 104, 105
Bosanquet, L. S.
Note on convexity theorems. 42
Bose, B. N.
On certain transformations in generalized hyper-geometric series. 152
Bose, R. C., Chowla, S., and Rao, C. R.
On the integral order, (mod p) of quadratics x^2+ax+b, with applications to the construction of minimum functions for $GF(p^2)$, and to some number theory results. 256
Bosworth, R. C. L.
Bessel's formula in relation to the calculation of the probable error from a small number of observations. 162
Botella Raduán, F.
On the analytic expression of the curvature of a Riemannian space. 216
Botts, T.
Sufficient conditions for a generalized-curve problem in the calculus of variations. 128
Bouffard, J.
Balistique extérieure. Nouvelle méthode de calcul et d'étude de la trajectoire d'un projectile. 24
Boukidis, N. A., and Ruggiero, R. J.
An iterative method for determining dynamic deflections and frequencies. 140
Bourbaki, N.
Éléments de mathématique. Part I. Les structures fondamentales de l'analyse. Livre II. Algèbre. Chapitre I. Structures algébriques. 113
Bourgin, D. G., and Mendel, C. W.
Orthonormal sets of periodic functions of the type $\{f(nx)\}$. 266
Bouvaist, R., and Thébault, V.
Sur les triangles isopolaires. 14
Sur la géométrie du tétraèdre. 100
Bowker, A. H.
Note on consistency of a proposed test for the problem of two samples. 10
Boyer, C. B.
Pascal's formula for the sums of powers of the integers. 85
Early graphical solutions of polynomial equations. 253
Historical stages in the definition of curves. 253
Bradshaw, J. W.
More modified series. 45
Brandt, A.
The free Lie ring and Lie representations of the full linear group. 146
Brandt, W. H.
Solution of the diffusion equation applicable to the edgewise growth of pearlite. 178
Brasch, F. E.
Obituary: David Eugene Smith. 142
Brauer, R.
On the arithmetic in a group ring. 34
Broad, C. D.
Hr. von Wright on the logic of induction. I, II, III. 32
Brodeau, A.
Poutres minces. Flexion, torsion, aplatissement. 83
Brodetsky, S.
The general motion of the aeroplane. 137
de Broglie, L., and Tonnelat, M.-A.
L'introduction des constantes de Coulomb et de Newton en mécanique ondulatoire. 224
Bronowski, J.
An inequality relating means. 147
Brooks, R. L.
On colouring the nodes of a network. 281
Broudno, A. L.
Sommation des suites bornées par les méthodes linéaires régulières. 150
Brouwer, D.
Integration of the equations of general planetary theory in rectangular coordinates. 189
Brouwer, L. E. J.
Zum freien Werden von Mengen und Funktionen. 31
Beweis dass der Begriff der Menge höherer Ordnung nicht als Grundbegriff der intuitionistischen Mathematik in Betracht kommt. 31
Die repräsentierende Menge der stetigen Funktionen des Einheitskontinuums. 31
Brown, F. L.
Remarks concerning tri-operational algebra. 143
Brown, L. M.
Some parameters of sampling distributions simply obtained. 91
On a chain of circle theorems. 100
Bruck, R. H.
The number of absolute invariants of a tensor. 107
Some results in the theory of linear non-associative algebras. 116
Simple quasigroups. 147
Bruck, R. H., and Wade, T. L.
The number of independent components of the tensors of given symmetry type. 23
Brunk, H. D.
Theorems of composition for Dirichlet series. 268
Buckel, W.
Über eine Verallgemeinerung der Dupinschen Indikatrix. 217
Buckley, F.
Transformations of the fundamental equations of thermodynamics. 223
Bulgakov, B. V.
On operational solutions of systems of linear differential equations with constant coefficients. 66
Sur les transformations des équations des systèmes non-conservatifs. 243
Bunge, M.
The total spin of a mass-system of two particles. 111
Burkill, J. C.
Obituary: Henri Lebesgue, 1875–1941. 142, 254
Burton, H. E.
The optics of Euclid. 253
Busemann, H.
Local metric geometry. 97
Butler, C. C. See Rymer, T. B.

Caballé, E. Torroja. See Torroja Caballé.
Caccioppoli, R., and Ghizzetti, A.
Ricerche asintotiche per una particolare equazione differenziale non lineare. 153
Ricerche asintotiche per una classe di sistemi di equazioni differenziali ordinarie non lineari. 153
Caligo, D.
Alcuni sviluppi di Taylor considerati sul cerchio di convergenza. 85
Sulle equazioni differenziali lineari del secondo ordine a coefficienti periodici. 86
Calleja, P. Pi. See Pi Calleja.
Cameron, R. H., and Martin, W. T.
Transformations of Wiener integrals under translations. 5

Cameron, R. H., and Martin, W. T. (Continued)
The Wiener measure of Hilbert neighborhoods in the space of real continuous functions. 132
Evaluation of various Wiener integrals by use of certain Sturm-Liouville differential equations. 160
Campbell, J. W.
Motion with respect to moving axes. 74
Capellen, W. Meyer zur. See Meyer zur Capellen.
Carlson, F.
Quelques inégalités concernant les fonctions analytiques. 205
Carrier, G. F.
The thermal-stress and body-force problems of the infinite orthotropic solid. 26
Carrillo, N.
Propagation of waves in elasto-plastic media. 252
Cartan, H.
La théorie générale du potentiel dans les espaces homogènes. 86
Carter, G. K.
Numerical and network-analyzer solution of the equivalent circuits for the elastic field. 140
Carter, G. K., and Kron, G.
Network analyzer solution of the equivalent circuits for elastic structures. 140
Numerical and network-analyzer tests of an equivalent circuit for compressible fluid flow. 191
A.C. network analyzer study of the Schrödinger equation. 219
Carter, G. W.
The simple calculation of electrical transients. 282
Castro, F. M. de Oliveira. See Oliveira Castro.
Caton, W. B., and Hille, E.
Laguerre polynomials and Laplace integrals. 268
Čebyšev, P. L.
Collected works. Vol. 1. Theory of numbers. 254
Cernuschi, F., and Saleme, E.
A new scheme of contagion in probability. 233
Cerrillo, M.
Simple method of establishing the canonical equations of electrical networks. 282
Cesari, L.
Sulle trasformazioni continue. 43
Cesco, C. U., Chandrasekhar, S., and Sahade, J.
On the radiative equilibrium of a stellar atmosphere. IV, VI. 244
Cesco, R. P.
On a Tauberian theorem for Nörlund summability. 210
Četajev, N. G.
Theorem concerning the non-stability of regular systems. 225
Chabauty, C.
Sur le théorème fondamental de la théorie des points entiers et pseudo-entiers des courbes algébriques. 58
Sur les points rationnels des variétés algébriques dont l'irrégularité est supérieure à la dimension. 102
Démonstration de quelques lemmes de rehaussement. 185
Chadaja, F. G.
On the error in the numerical integration of ordinary differential equations by the method of finite differences. 53
Chakrabarty, S. K.
On the convergency of the solutions of cascade equations in cosmic radiation. 110
Photons associated with a cascade shower. 284
Chandrasekhar, S. (Cf. Cesco, C. U.)
On the radiative equilibrium of a stellar atmosphere. I, II, III, V, VII, VIII. 76, 190, 244
Chandrasekharan, K.
Partially ordered sets and symbolic logic. 143
On the canonical expression for a meromorphic function of finite order. 206
Chang, Su-Cheng.
On the surfaces of coincidence. 20
Chang, Su-Cheng. (Continued)

Wilkinson, R. I.
The combination of probability curves in engineering. 232
Willers, F. A.
Die Stabilität von Kreisringplatten. 196
Wilson, E. B.
Note on the t-test. 163
Wilson, E. B., and Worcester, J.
A second approximation to Soper's epidemic curve. 12
The epidemic curve with no accession of susceptibles. 239
Wilson, W.
Kinematic relativity. 72
Wintgen, G.
Zur Darstellungstheorie der Raumgruppen. 41
Wintner, A.
The Lebesgue constants of Möbius' inversion. 118
A summation method associated with Dirichlet's divisor problem. 150
Gibbs' phenomenon and the prime number theorem. 172
Diophantine approximations and Hilbert's space. 172
The moment problem of enumerating distributions. 173
The non-local existence problem of ordinary differential equations. 225
The densities of ideal classes and the existence of unities in algebraic number fields. 260
Number-theoretical almost-periodicities. 260
Wirtinger, W.
Integrale dritter Gattung und linear polymorphe Funktionen. 263
Wiseman, R. T.
The use of punched card equipment for the calculation of policy values and guarantees. 53
Wittich, H.
Ganze Lösungen der Differentialgleichung $\Delta u = e^u$. 228
Wold, H.
A synthesis of pure demand analysis. II, III. 238
Wolff, J. (Cf. von Aardenne-Ehrenfest, T.)
La représentation conforme au voisinage d'un point frontière. 61
Wolfowitz, J. (Cf. Wald, A.)
Note on runs of consecutive elements. 5
Asymptotic distribution of runs up and down. 8
Wong, Yung-Chow.
Quasi-orthogonal ennuple of congruences in a Riemannian space. 188
Worcester, J. See Wilson, E. B.
Wormser, G.
Sur les nombres premiers représentables par des polynomes du second degré. 37
von Wright, G. H.
The logical problem of induction. 32
Wunderlich, W.
Zur Eindeutigkeitsfrage der Hauptaufgabe der Photogrammetrie. 15
Zur Reflexion von Röntgenstrahlen an Kristallen. 184
Wyk, J. C. Van. See Van Wyk.
Wylie, C. R., Jr.
Hilbert's axioms of plane order. 98
Wyman, M.
Static isotropic solutions of Einstein's field equations. 241

Yablokov, V. A.
Oscillations of fluids in a rectangular basin rotating with a constant angle velocity. 194
Yang, Cheng-Ning.
On the uniqueness of Young's differentials. 43
Young, A. D. See Goldstein, S.
Young, G. S., Jr.
A generalization of Moore's theorem on simple triods. 96
On continua whose links are non-intersecting. 164
Spaces in which every arc has two sides. 277
Young, L. C.
An expression connected with the area of a surface $z = F(x, y)$. 121
Youngs, J. W. T.
The topological theory of Fréchet surfaces. 278
Yung-Chow Wong. See Wong.
Yvon, J.
Équations de Madelung de l'électron magnétique non relativiste. 283

Zariski, O.
Reduction of the singularities of algebraic three dimensional varieties. 102
The theorem of Bertini on the variable singular points of a linear system of varieties. 186
The compactness of the Riemann manifold of an abstract field of algebraic functions. 186
Zee-Kiang, Sūe-yung.
On the variation of increasing functions whose first $2n$ Fourier coefficients are given. 264
Zeilon, N.
On the theory of the Stark effect. 214
Zinke, O.
Beitrag zur geschlossenen Näherungsdarstellung elliptischer Integrale. 218
Zuckerman, H. S. See Birnbaum, Z. W.
zur Capellen, W. Meyer. See Meyer zur Capellen.
Zwinggi, E.
Über den Vergleich von Verhältniszahlen. Beispiele für die Anwendung neuerer statistischer Verfahren im Gebiete der Versicherung. 94
Zygmund, A.
On the degree of approximation of functions by Fejér means. 265

SUBJECT INDEX

The sign * is used to mark only those books which contain a general exposition of the field in question.

Should a cross-reference refer to a field or subfield which does not occur in this subject index, this means that no paper reviewed in this volume has been classified as belonging to that field or subfield.

ABELIAN GROUPS. See: groups.

ABELIAN INTEGRALS. See: algebraic functions; algebraic geometry; elliptic functions.

ABSOLUTE DIFFERENTIAL CALCULUS. See: differential geometry (Riemannian geometry); vector calculus (tensors).

ABSOLUTELY MONOTONE FUNCTIONS. See: completely monotone functions.

ABSTRACT SPACES. See: differential geometry (Finsler spaces); ergodic theory; functional analysis; functions of real variables (functions in abstract spaces); geometry (abstract metrics); measure and integration; sets; topology (topological spaces).

ACOUSTICS. Cf. Mechanics of continua; numerical methods (practical harmonic analysis).

Miles, J. 79 Jones, R. C. 250

ACTUARIAL MATHEMATICS. Cf. Probability; statistics.

Mathematics of finance. Cf. Economics; numerical methods (equations).

Tortorici, P. 134

Analysis of mortality. Cf. Statistics (biometrics).

Stauber, K. 134 Schuler, W. P. 134

Insurance.

Müller, M. 94 Schärf, H. 94 Fischer, E. 134
Zwinggi, E. 94 Kreis, H. 94 Dasen, E. 134

ADDITIVE NUMBER THEORY. See: number theory (additive).

AERODYNAMICS. See: mechanics of continua.

AFFINE DIFFERENTIAL GEOMETRY. See: differential geometry (conformal).

AGGREGATES. See: lattices; sets.

AIRFOIL THEORY. See: mechanics of continua (airfoil theory).

ALGEBRA: ABSTRACT. Cf. Algebra: linear; groups.

ZETA FUNCTIONS. See: Dirichlet series (zeta functions); number theory.

TRANSLITERATION OF RUSSIAN

The following system of transliterating Russian has been adopted by Mathematical Reviews for use beginning with volume 7.

а = a	л = l	ц = c
б = b	м = m	ч = č
в = v	н = n	ш = š
г = g	о = o	щ = šč
д = d	п = p	ъ = ″
е = e	р = r	ы = y
ж = ž	с = s	ь = ′
з = z	т = t	э = è
и = i	у = u	ю = yu
й = ĭ	ф = f	я = ya
к = k	х = h	

The system formerly used differed from this as follows: I was j, h was ch or kh, ″ was ', ′ was j, è was e, yu was ju, ya was ja.

Whenever an author's name is transliterated in the journal in which his paper appears, Mathematical Reviews uses that transliteration.

ERRATA

VOLUME 2

Pp. 85 and 276: **Nevanlinna.**
The two papers are identical.

VOLUME 3

P. 252: **Anadon Laplaza.**
In the title read 8–43 instead of 8–11.

VOLUME 4

Pp. 35 and 189: **Behrend.**
The two papers are identical.

P. 265: **Mordell** (first review).
The second sentence should read: "He illustrates his methods by showing in detail that certain equations of the form $x^3 = ax^3 + by^3 + c$ have infinitely many integer solutions, where each of a, b, c is a nonzero integer."
B. W. Jones (Ithaca, N. Y.).

Pp. 266f.: **Brauer.**
In the second line above the display read $n \geqq (p + 3)/2$ instead of $n \leqq (p + 3)/2$.

P. 270: **Pisot.**
In the second display, read γ^s, $\bar{\gamma}^s$ instead of γ^2, $\bar{\gamma}^2$.
In the fifth line from the end read β_k' instead of β_k^2.

VOLUME 5

P. 9: **Valeiras.**
In the title read "in" instead of "and."

Pp. 30 and 225: **Eckmann.**
The two papers are identical.

P. 57: **Richards.**
In the title read "a rithmomachia" instead of "arithmomachia."

P. 96: **Bary.**
The reference should be to Rec. Math. [Mat. Sbornik] N.S. 12(54), 3–27 (1942); these Rev. 5, 5.

P. 218: **Barajas.**
In the review it was claimed that the author had copied a misprint which appeared in a paper by G. D. Birkhoff. The reviewer would like to withdraw this claim and to say that the equations of motion obtained by using the Birkhoff theory of gravitation are correct as given in both papers when the differentiation symbol is taken to mean differentiation with respect to s. The equations given by the reviewer are correct when t is used as the independent variable.
M. Wyman (Edmonton, Alta.).

P. 328: **Pollard.**
The review appeared in vol. 5, p. 178f., not vol. 4.

VOLUME 6

Pp. 8f.: **Tippett.**
In the last line of the review read "charts" instead of "cards."

P. 30: **van Dantzig.**
In lines 6–9 read: "The proof consists of two parts: the first, which is of finite constructive character, approximates the totality of all solutions by an embedding process, while the second picks out one solution according to the principle that the point set," etc.

P. 40: **Baer.**
In the title read **66** instead of **64**.

P. 46: **Fuchs.**
The page numbers were taken from page proof. In the published issue they are 188–196.
In the fourth line from the end read σ^{-1} instead of C^{-1}.

P. 54: **Schelkunoff.**
In line 3 read "waves" instead of "walls."

P. 57: **Mordell** (first review).
In the second and third lines, read: "The author derives the first upper bounds for the minimum of F which are lower than those obtained by Minkowski."
B. W. Jones (Ithaca, N. Y.).

P. 61: **McMillan.**
In the title read **66** instead of **64**.

P. 75: **García** (second review).
In the title read 221–230 instead of 3–12.

P. 75: **Roy.**
In the author's name, read Kumar instead of Kumal.

P. 120: **Valentine.**
In line 4 read $\leqq$ instead of $=$.

P. 126: **Cooper.**
In line 8 from the end, after (C, n) add "(for $n = 0, 1$)."

P. 135: **Pugachev.**
In line 5 read "equatorial" instead of "equational."

P. 140: **Illiushin.**
Instead of "reviewed above," read "reviewed on p. 252."

P. 220: **Benjamin.**
In the title delete *.

P. 222: **Blasov.**
The author's name is Vlasov, not Blasov.

PRINCETON MATHEMATICAL SERIES

Edited by

MARSTON MORSE H. P. ROBERTSON A. W. TUCKER

1. **The Classical Groups.**
By HERMANN WEYL — Temporarily out of stock

2. **Topological Groups.**
By L. PONTRJAGIN (translated by E. Lehmer)
Temporarily out of stock

3. **An Introduction to Differential Geometry.**
By LUTHER PFAHLER EISENHART — 304 pages, $3.50

4. **Dimension Theory.**
By WITOLD HUREWICZ AND HENRY WALLMAN
165 pages, $3.00

5. **Analytical Foundations of Celestial Mechanics.**
By AUREL WINTNER — 448 pages, $6.00

6. **The Laplace Transform.**
By DAVID VERNON WIDDER — 406 pages, $6.00

7. **Integration.**
By EDWARD JAMES MCSHANE — 400 pages, $6.00

8. **Theory of Lie Groups.**
By C. CHEVALLEY — In preparation

OUTSTANDING McGRAW-HILL BOOKS

ANALYTIC GEOMETRY

By Ross R. MIDDLEMISS, Washington University. 306 pages, $2.75

Designed especially to meet the needs of scientific and technical students. Covers conic sections, polynomial curves, and exponential, logarithmic, trigonometric, and inverse trigonometric functions and their graphs.

DIFFERENTIAL AND INTEGRAL CALCULUS

By Ross R. MIDDLEMISS. 416 pages, $2.50

Intended for the usual beginning course, this book maintains a high degree of accuracy, and is at the same time exceptionally clear and readable. The book has been carefully planned to give the student a real understanding of the subject.

ALGEBRA: A SECOND COURSE

By R. ORIN CORNETT, Lecturer, Harvard University; on leave from Oklahoma Baptist University. 317 pages, $2.00

An entirely new approach, based on the idea that mastery of detail and routine operations should be preceded by an understanding of purpose, significance, and relation to the whole.

ANALYTIC GEOMETRY. *New third edition*

By FREDERICK S. NOWLAN, University of British Columbia. In press—ready in January

Mathematically sound, easy to understand, and stimulating to the imagination, the new edition of this well known text contains an unusual number of distinctive features: the study of plane geometry is based upon the use of direction cosines; the study of conics is based upon the definition of *the general conic;* and polar coordinates are treated from a new point of view.

THE DEVELOPMENT OF MATHEMATICS. *New second edition*

By E. T. BELL, California Institute of Technology. 618 pages, $5.00

As before, this widely used book tells the absorbing story of the part played by mathematics in the evolution of civilization, from about 4000 B.C. to the present day. The new edition contains fresh material concerned with recent trends and developments in modern mathematics.

MATHEMATICAL THEORY OF ELASTICITY

By I. S. SOKOLNIKOFF, University of Wisconsin. In press—ready in February

Writing from the point of view of a mathematical physicist, the author provides a thorough foundation in the mathematical theory of elasticity, followed by the application of the theory to problems on extension, torsion, and flexure of isotropic cylindrical bodies.
